Forecast for Thursday 21 Apr 2022

Weather: Dry, partly cloudy and becoming chilly overnight with strong winds over hilltops. Remaining dry and breezy through the day, some patchy cloud developing by the afternoon, but clearing again during the early evening. Patches of low cloud may affect mainly eastern slopes from mid-evening onwards, however, it will stay dry.

Chance of cloud-free hill tops above 600m: Greater than 95%, becoming 70% from mid-evening.

Low cloud and visibility: Good or very good, with distant hills easily visible. A chance of poor visibility in patchy cloud above around 400-500m from mid-evening.

Forecast for Friday 22 Apr 2022

Weather: Dry during the night, again with strong winds and a chance of gale force gusts over the highest summits. Low cloud increasingly obscuring hilltops. A rather grey and cloudy start to the morning, but cloud soon lifting and breaking to bright or sunny spells. Remaining dry through the afternoon, then cloud thickening and lowering again into the evening. Staying windy, with a low risk of gales on the highest peaks.

Maximum wind: Northeast 30mph, gusting 45-50mph.

Chance of cloud-free hill tops above 600m: 70% becoming 30% overnight. Increasing to greater than 95% from mid-morning. Decreasing to 60% from mid-evening.

Low cloud and visibility: Poor visibility in hill fog with cloud developing fairly extensively (especially in the east) in the early hours until mid-morning; bases 400-500m. A chance of hill fog patches from late evening above around 500m. Otherwise very good visibilities.

Temperature: **Valleys:** Plus 6 increasing to Plus 14 Celsius.
At 600m: Plus 3 increasing to Plus 8 Celsius.
Freezing level: Above summits.
